

HISTORIC MIRAMAR INFRASTRUCTURE IMPROVEMENTS PROJECT (HMII3) Newsletter

September 30, 2019 Vol. 27

The HMII3 Project Team is managing the Historic Miramar Infrastructure Improvements Project Phase 3 (HMII3). The intent of this project is to update the 1950's era water mains, construct new storm drains and swales, and enhance fire protection with additional fire hydrants. It will also provide sanitary sewer services that will allow property owners to abandon their septic tanks once connected to the new sewer system. This project is also aimed at improving stormwater drainage in your neighborhood.

Currently, restoration is the focal point of the HMII3 project. During this phase, beginning September 30, 2019, Reynolds Construction will begin to restore concrete driveways, sidewalks and swales between SW 68th Avenue to SW 66th Avenue from SW 18th Street to SW 24th Street. Restoration of stamped concrete driveways may take longer to complete but will be restored on a case by case basis by the end of the project.

The final phase of sewer lateral installation on SW 18th Street between SW 66th Avenue and SW 64th Avenue is under construction, completing the sewer construction of the new sewer system. The next steps will include testing and certifying the new sewer system.

Reynolds construction is primarily focused on completing the construction of the storm drainage system and the various elements of restoration.

Stay current and follow HMII3 construction activity in your area with the City of Miramar's HMII3 Interactive Map. The link below provides updates and progress status.
