

HISTORIC MIRAMAR INFRASTRUCTURE IMPROVEMENTS PROJECT (HMII3) Newsletter

October 28, 2019 Vol. 30

The HMII3 Project Team is managing the Historic Miramar Infrastructure Improvements Project Phase 3 (HMII3). The intent of this project is to update the 1950's era water mains, construct new storm drains and swales, and enhance fire protection with additional fire hydrants. It will also provide sanitary sewer services that will allow property owners to abandon their septic tanks once connected to the new sewer system. This project is also aimed at improving stormwater drainage in your neighborhood.

Reynolds Construction continues to make progress during the resotation phase to restore concrete driveways, sidewalks, sprinklers and swales. Restoration of stamped concrete driveways may take longer to complete but will be restored on a case by case basis by the end of the project. There will be no sprinkler restoration on 66th Avenue or east of 66th Avenue at the time. Restoration of these sprinklers will be completed soon.

Water main tie-ins and temporary connections will continue on SW 66th Avenue between SW 24th and 25th Streets north.

Sewer main laterals have been completed with the exception of a section of 66th Avenue.

Storm drainage is projected to be completed within the next four weeks.

As we work to complete Phase 3 of the HMII, we will also be working to close out all pending project claims and complaints. If there is a concern regarding your property, please contact Adams Consulting Group at hmii3@adamsconsulting.biz or 954.998.3146.

Stay abreast of HMII3 construction activity in your area with the City of Miramar's HMII3 Interactive Map. The link below provides updates and progress status.
