

City of Miramar Consolidated Retirement Plan & Trust Fund

Actuarial Valuation Report as of October 1, 2024

Annual Employer Contribution for the Fiscal Year Ending
September 30, 2026

April 7, 2025

Board of Trustees
City of Miramar Consolidated Retirement Plan & Trust Fund
Miramar, Florida

Dear Board Members:

The results of the October 1, 2024 Annual Actuarial Valuation of the City of Miramar Consolidated Retirement Plan & Trust Fund are presented in this report.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress, to determine the employer contribution rate for the fiscal year ending September 30, 2026, and to determine the actuarial information for GASB Statement No. 67 for the fiscal year ending September 30, 2024. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The findings in this report are based on data and other information through September 30, 2024. The valuation was based upon information furnished by the Plan Administrator concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

Board of Trustees

April 7, 2025

Page ii

This report was prepared using certain assumptions approved by the Board as authorized under Florida Statutes and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial Assumptions and Methods. The investment return assumption was prescribed by the Board and the assumed mortality rates detailed in the Actuarial Assumptions and Methods section were prescribed by Chapter 112.63 of the Florida Statutes. All actuarial assumptions used in this report are reasonable for purposes of this valuation. The combined effect of the assumptions, excluding prescribed assumptions or methods set by law, is expected to have no significant bias (i.e. not significantly optimistic or pessimistic).

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

Jeffrey Amrose and Trisha Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH & COMPANY

SECTION A

DISCUSSION OF VALUATION RESULTS

DISCUSSION OF VALUATION RESULTS

Comparison of Required Employer Contributions

The minimum required employer contribution developed in this year's valuation is compared below with that of the previous valuation:

	For FYE 9/30/2026 Based on 10/1/2024 Valuation	For FYE 9/30/2025 Based on 10/1/2023 Valuation	Increase (Decrease)
Required Employer Contribution As % of Covered Payroll	\$ 13,172,691 26.48 %	\$ 12,120,483 26.06 %	\$ 1,052,208 0.42 %

The contribution has been adjusted for interest on the basis that the employer contribution is paid in full on the first day of the fiscal year. The actual employer contribution during the year ending September 30, 2024 was \$10,242,347 compared to the required amount of \$10,242,347 based on the payment schedule.

Revisions in Benefits

There were no revisions in benefits in this valuation.

Revisions in Actuarial Assumptions or Methods

There were no revisions in actuarial assumptions or methods in this valuation.

Actuarial Experience

During the past year, there was a net actuarial loss of \$6,938,119 for the year, which means that actual experience was less favorable than expected. This loss is primarily due to greater than expected salary increases (9.3% actual versus 5.2% expected for prior General Plan members and 8.4% actual versus 4.0% for prior Management Plan members) and fewer terminations than expected. This loss was partially offset due to greater than expected recognized investment earnings. The net investment return based on the actuarial value of assets was 8.7% compared to the 7.0% expected. The net investment return based on the Market Value of assets was 20.4%. The net actuarial loss increased the required employer contribution by 0.97% of covered payroll.

Funded Ratio

The funded ratio, one measure of the Plan's financial health, is equal to the actuarial value of assets divided by the actuarial accrued (past service) liability. The funded ratio is 79.2% this year compared to 79.4% last year.

Analysis of Change in Employer Contribution

The components of change in the required employer contribution are as follows:

Contribution rate last year	26.06 %
Revision in Benefits	0.00
Revision in Assumptions/Methods	0.00
Amortization Payment on UAAL*	(0.19)
Actuarial Experience	0.97
Change in Administrative Expense	(0.10)
Normal Cost Rate	<u>(0.26)</u>
Contribution rate this year	26.48

** Primarily due to covered payroll increasing by 7% from October 1, 2023 to October 1, 2024.*

Variability of Future Contribution Rates

The Actuarial Cost Method used to determine the contribution rate is intended to produce contribution rates which are generally level as a percent of payroll. Even so, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year. Over time, if the year-to-year gains and losses offset each other, the contribution rate would be expected to return to the current level, but this does not always happen.

The Market Value of Assets exceeds the Actuarial Value of Assets by \$15,958,968 as of the valuation date (see Section C). This difference will be gradually recognized and, in the absence of offsetting losses, the computed contribution rate will gradually decrease by approximately 2.2% of covered payroll.

Relationship to Market Value

If market value had been the basis for the valuation, the City contribution rate would have been 24.24% and the funded ratio would have been 84.4%.

Other Cost Considerations

Due to the ordinances that allow members to purchase additional airtime service, the City's exposure to risk has increased. If the experience of the Plan does not meet the assumptions used to determine the cost of the additional airtime service purchase, there can be a significant increase in the Actuarially Determined Employer Contributions.

Conclusion

The remainder of this Report includes detailed actuarial valuation results, pension fund information, miscellaneous information and statistics, and a summary of plan provisions.

RISKS ASSOCIATED WITH THE MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

PLAN MATURITY MEASURES

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	<u>2024</u>	<u>2023</u>
Ratio of the market value of assets to payroll	5.42	4.75
Ratio of actuarial accrued liability to payroll	6.43	6.25
Ratio of actives to retirees and beneficiaries	1.6	1.7
Ratio of net cash flow to market value of assets	1.19 %	2.04 %

RATIO OF MARKET VALUE OF ASSETS TO PAYROLL

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

RATIO OF ACTUARIAL ACCRUED LIABILITY TO PAYROLL

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

RATIO OF ACTIVES TO RETIREES AND BENEFICIARIES

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

RATIO OF NET CASH FLOW TO MARKET VALUE OF ASSETS

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

ADDITIONAL RISK ASSESSMENT

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

LOW-DEFAULT-RISK OBLIGATION MEASURE

Actuarial Standards of Practice No. 4 (ASOP No. 4) was revised and reissued in December 2021 by the Actuarial Standards Board (ASB). It includes a new calculation called a low-default-risk obligation measure (LDROM) to be prepared and issued annually for defined benefit pension plans. The transmittal memorandum for ASOP No. 4 includes the following explanation:

“The ASB believes that the calculation and disclosure of this measure provides appropriate, useful information for the intended user regarding the funded status of a pension plan. The calculation and disclosure of this additional measure is not intended to suggest that this is the “right” liability measure for a pension plan. However, the ASB does believe that this additional disclosure provides a more complete assessment of a plan’s funded status and provides additional information regarding the security of benefits that members have earned as of the measurement date.”

The following information has been prepared in compliance with this new requirement. Unless otherwise noted, the measurement date, actuarial cost methods, and assumptions used are the same as for the funding valuation covered in this actuarial valuation report.

A. Low-default-risk Obligation Measure of benefits earned as of the measurement date:

\$457,548,288

B. Discount rate used to calculate the LDROM: 3.81% based on Bond Buyer “20-Bond GO Index” as of September 26, 2024

C. Other significant assumptions that differ from those used for the funding valuation: none

D. Actuarial cost method used to calculate the LDROM: Individual Entry-Age Actuarial Cost Method

E. Valuation procedures to value any significant plan provisions that are difficult to measure using traditional valuation procedures, and that differ from the procedures used in the funding valuation: none

F. Commentary to help the intended user understand the significance of the LDROM with respect to the funded status of the plan, plan contributions, and the security of participant benefits: The LDROM is a market-based measurement of the pension obligation. It estimates the amount the plan would need to invest in low risk securities to provide the benefits with greater certainty. This measure may not be appropriate for assessing the need for or amount of future contributions. This measure may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan’s benefit obligation.

The difference between the two measures (Valuation and LDROM) is one illustration of the savings the sponsor anticipates by taking on the

ACTUARIAL GAINS AND LOSSES

The assumptions used to anticipate mortality, employment turnover, investment income, expenses, salary increases, and other factors have been based on long range trends and expectations. Actual experience can vary from these expectations. The variance is measured by the gain and loss for the period involved. If significant long-term experience reveals consistent deviation from what has been expected and that deviation is expected to continue, the assumptions should be modified.

1. Last Year's UAAL	\$ 57,849,094
2. Last Year's Employer Normal Cost	5,605,858
3. Last Year's Contributions	10,242,347
4. Interest at the Assumed Rate on:	
a. 1 and 2 for one year	4,441,847
b. 3 from dates paid	<u>358,482</u>
c. a - b	4,083,365
5. This Year's Expected UAAL Before any Changes in Benefits or Actuarial Assumptions: 1 + 2 - 3 + 4c	57,295,970
6. Changes in UAAL due to Changes in Benefits and/or Actuarial Assumptions	0
7. This Year's Expected UAAL After any Changes in Benefits or Actuarial Assumptions: 5 + 6	57,295,970
8. This Year's Actual UAAL After any Changes in Benefits or Actuarial Assumptions	64,234,088
9. Net Actuarial Gain (Loss): 7 - 8	(6,938,119)
10. Gain (Loss) due to Investments	3,989,742
11. Gain (Loss) from Other Sources	(10,927,861)

Net actuarial gains and (losses) in previous years have been as follows:

Year Ended	Gain (Loss)
9/30/82	\$ (31,425)
9/30/83	114,376
9/30/84	(111,852)

9/30/2023	5.9	7.0	12.6 GE/13.8 Mgmt.	5.2 GE/4.0 Mgmt.
9/30/2024	8.7	7.0	9.3 GE/8.4 Mgmt.	5.2 GE/4.0 Mgmt.

The above table shows amounts for the former General Employees Plan through 9/30/2021 and for the Consolidated Plan starting 9/30/2022. The actual investment return rates shown above are based on the actuarial value of assets. The actual salary increase rates shown above are the increases received by those active members who were included in the actuarial valuation both at the beginning and the end of each year.

For the former Management Plan, the actual fund earnings and salary increase rates compared to the assumed rates for the last few years through 9/30/2021 are as follows:

Year Ending	Investment Return		Salary Increases	
	Actual	Assumed	Actual	Assumed
9/30/2003	(0.4) %	8.5 %	N/A %	4.5 %
9/30/2004	8.6	8.5	14.2	4.5
9/30/2005	6.5	8.5	1.9	4.5
9/30/2006	9.0	8.5	7.9	4.5

ACTUARIAL ASSUMPTIONS AND COST METHOD

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

Financing of Unfunded Actuarial Accrued Liabilities - Unfunded Actuarial Accrued Liabilities (full funding credit if assets exceed liabilities) were amortized by level (principal & interest combined) percent-of-payroll contributions over a reasonable period of future years.

Actuarial Value of Assets - The Actuarial Value of Assets phase in the difference between the expected actuarial value and actual market value of assets at the rate of 20% per year. The Actuarial Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than assumed rate, Actuarial Value of Assets will tend to be greater than Market Value.

Valuation Assumptions

The actuarial assumptions used in the valuation are shown in this Section. The covered group is too small to provide statistically significant experience on which to base certain demographic assumptions. Mortality is based on a commonly used fully generational mortality table and projection scale that is mandated by the Florida Statutes. The retirement age assumption tracks the eligibility requirements for normal retirement. The investment return assumption was last updated in the year 2012.

Economic Assumptions

The investment return rate assumed in the valuation is 7.0% per year, compounded annually (net of investment expenses).

The **Wage Inflation Rate** assumed in this valuation was 2.5% per year. The Wage Inflation Rate is defined to be the portion of total pay increases for an individual that are due to macro-economic forces including productivity, price inflation, and labor market conditions. The wage inflation rate does not include pay changes related to individual merit and seniority effects.

The assumed **real rate of return** over wage inflation is defined to be the portion of total investment return that is more than the assumed wage inflation rate. Considering other economic assumptions, the 7.0% investment return rate translates to an assumed real rate of return over wage inflation of 4.5%.

The active member population is assumed to remain constant. For purposes of financing the unfunded liabilities, total payroll is assumed to grow at 3.5% per year, but not more than the most recent ten-year average, which is 7.07%.

Pay increase assumptions for individual active members are shown below. Part of the assumption for each age is for merit and/or seniority increase, and the other 2.5% recognizes wage inflation, including price inflation, productivity increases, and other macro-economic forces.

The rates of salary increase used for active employees are in accordance with the following tables. This assumption is used to project a member's current salary to the salaries upon which benefits will be based.

General Employees Plan

Years of Service	% Increase in Salary		
	Merit and Seniority	Base (Economic)	Total Increase
1	5.0%	2.5%	7.5%
2	4.5%	2.5%	7.0%
3	4.0%	2.5%	6.5%
4	3.5%	2.5%	6.0%
5	3.0%	2.5%	5.5%
6+	2.5%	2.5%	5.0%

Management Plan

Years of Service	% Increase in Salary		
	Merit and Seniority	Base (Economic)	Total Increase
1	1.5%	2.5%	4.0%
5	1.5%	2.5%	4.0%
10	1.5%	2.5%	4.0%
15	1.5%	2.5%	4.0%
20 +	1.5%	2.5%	4.0%

Demographic Assumptions

The mortality tables used in the valuation are based on the PUB-2010 Headcount Weighted Mortality Tables described below, with mortality improvements projected to all future years after 2010 using Scale MP-2018.

	Pre-Retirement PUB-2010 Table	Post-Retirement PUB-2010 Table
Female (General)	Headcount Weighted General Below Median Employee Female Table	Headcount Weighted General Below Median Healthy Retiree Female Table
Male (General)	Headcount Weighted General Below Median Employee Male Table, set back 1 year	Headcount Weighted General Below Median Healthy Retiree Male Table, set back 1 year

These are the same rates as used by the Florida Retirement System (FRS) in their July 1, 2023 Actuarial Valuation Report for Regular class members (other than K-12 School Instructional Personnel). Florida Statutes Chapter 112.63(1)(f) mandates the use of the mortality tables from either of the two most recently published actuarial valuation reports of FRS.

The following table present post-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of each benefit payment being made after retirement.

Post-Retirement Mortality (FRS Regular Class Healthy Tables)

Sample Attained Ages (in 2024)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.19 %	0.57 %	33.44	37.22
55	0.94	0.56	29.07	32.77
60	1.11	0.58	24.95	28.21
65	1.27	0.68	20.87	23.61
70	1.77	1.07	16.82	19.11
75	2.81	1.84	13.09	14.92
80	4.70	3.31	9.79	11.14

The following table present pre-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of active members dying prior to retirement.

Pre-Retirement Mortality (FRS Regular Class Healthy Tables)

Sample Attained Ages (in 2024)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.19 %	0.11 %	37.96	40.49
55	0.29	0.17	32.95	35.36
60	0.45	0.25	28.09	30.33
65	0.64	0.37	23.38	25.39
70	0.89	0.56	18.81	20.56
75	1.32	0.91	14.36	15.86
80	2.08	1.53	10.05	11.34

This assumption is used to measure the probabilities of active members dying prior to retirement.

The rates of retirement used to measure the probability of eligible members retiring during the next year were as follows:

General Employees Plan

Retirement Ages	Rate	Years of Service	Rate
65	40 %	20	25 %
66	20	21	15
67	20	22	15
68	20	23	15
69	20	24	15
70	100	25	30
71	100	26	20
72	100	27	20
73	100	28	20
74	100	29	20
75	100	30	100

Management Plan

Retirement Ages	Years of Service		
	10 - 19.99	20 - 24.99	25+
45 - 54	0 %	15 %	100 %
55 - 61	5	25	100
62 - 64	5	50	100
65+	100	100	100

10% is added to assumed rate upon first eligibility

The rate of retirement is 5% for each year of eligibility for early retirement.

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment.

General Employees Plan

Years of Service	Turnover
1	19.0%
5	7.0%
10	4.0%
15	1.5%
20 +	0.0%

Management Plan

Age	Turnover
25	16.6%
30	15.0%
35	11.8%
40	8.2%
45	4.8%
50	1.7%
55	0.6%
60	0.5%

Rates of disability are not applicable.

Changes from Prior Valuation: There were no changes in assumptions or methods since the prior valuation.

Miscellaneous and Technical Assumptions

<i>Administrative & Investment Expenses</i>	The investment return assumption is intended to be the return net of investment expenses. Annual administrative expenses are assumed to be equal to the average of the prior two years' expenses. Assumed administrative expenses are added to the Normal Cost.
<i>Benefit Service</i>	Exact fractional service is used to determine the amount of benefit payable.
<i>Decrement Operation</i>	Disability and mortality decrements operate during retirement eligibility.
<i>Decrement Timing</i>	Decrements of all types are assumed to occur at the beginning of the year.
<i>Eligibility Testing</i>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<i>Forfeitures</i>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<i>Incidence of Contributions</i>	Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
<i>Marriage Assumption</i>	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
<i>Normal Form of Benefit</i>	A life annuity is the normal form of benefit for new Consolidated Plan members and former General Employees Plan members. A 100% joint and survivor annuity is the normal form of benefit for former Management Plan members.
<i>Pay Increase Timing</i>	Middle of fiscal year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
<i>Service Credit Accruals</i>	It is assumed that members accrue one year of service credit per year.

GLOSSARY

<i>Actuarial Accrued Liability (AAL)</i>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<i>Actuarial Assumptions</i>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<i>Actuarial Cost Method</i>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability.
<i>Actuarial Equivalent</i>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<i>Actuarial Present Value (APV)</i>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<i>Actuarial Present Value of Future Benefits (APVFB)</i>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<i>Actuarial Valuation</i>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB No. 67.
<i>Actuarial Value of Assets</i>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined employer contributions (ADEC).

<i>Amortization Method</i>	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<i>Amortization Payment</i>	That portion of the plan contribution or ADEC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<i>Amortization Period</i>	The period used in calculating the Amortization Payment.
<i>Actuarially Determined Employer Contributions (ADEC)</i>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADEC consists of the Employer Normal Cost and Amortization Payment.
<i>Closed Amortization Period</i>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<i>Employer Normal Cost</i>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<i>Equivalent Single Amortization Period</i>	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
<i>Experience Gain/Loss</i>	A measure of the difference between the normal cost rate from last year and the normal cost rate from this year.
<i>Funded Ratio</i>	The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.
<i>GASB</i>	Governmental Accounting Standards Board.
<i>GASB No. 67 and GASB No. 68</i>	These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 67 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 68 sets the rules for the systems themselves.

<i>Normal Cost</i>	The annual cost assigned, under the Actuarial Cost Method, to the current plan year.
<i>Unfunded Actuarial Accrued Liability</i>	The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.
<i>Valuation Date</i>	The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

NOTES TO EMPLOYER'S NET PENSION LIABILITY
GASB Statement No. 67

Valuation Date: October 1, 2023
Measurement Date: September 30, 2024

Methods and Assumptions Used to Determine Net Pension Liability:

Actuarial Cost Method	Entry Age Normal
Inflation	2.50%
Salary Increases	5.0% - 7.5%, including inflation
Investment Rate of Return	7.00%
Retirement Age	Experience-based table of rates
Mortality	The same versions of Pub-2010 Headcount-Weighted Mortality Tables as used by the Florida Retirement System (FRS) in their July 1, 2021 actuarial valuation (with mortality improvements projected to all future years after 2010 using Scale MP-2018). Florida Statutes Chapter 112.63(1)(f) mandates the use of mortality tables from one of the two most recently published FRS actuarial valuation reports.

Other Information:

Notes See Discussion of Valuation Results from the October 1, 2023 Actuarial Valuation Report.

NOTES TO SCHEDULE OF CONTRIBUTIONS
GASB Statement No. 67

Valuation Date: October 1, 2022
Notes Actuarially determined contributions are calculated as of October 1, which is two years prior to the end of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percent, Closed
Remaining Amortization Period	20 years
Asset Valuation Method	The difference between the expected actuarial value of assets and actual market value of assets is recognized over 5 years
Inflation	2.50%
Salary Increases	4.00% - 7.50%, including inflation, depending on service
Investment Rate of Return	7.00%
Retirement Age	Experience-based table of rates
Mortality	The same versions of PUB-2010 Headcount-Weighted Mortality Tables as used by the Florida Retirement System (FRS) in their July 1, 2021 actuarial valuation (with mortality improvements projected to all future years after 2010 using Scale MP-2018). Florida Statutes Chapter 112.63(1)(f) mandates the use of mortality tables from one of the two most recently published FRS actuarial valuation reports.

Other Information:

Notes See Discussion of Valuation Results from October 1, 2022 Actuarial Valuation Report.

SINGLE DISCOUNT RATE
GASB Statement No. 67

A single discount rate of 7.00% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.00%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (7.00%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.00%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption

1% Decrease	Current Single Discount	1% Increase
6.00%	Rate Assumption	8.00%
7.00%		
\$72,506,680	\$37,150,381	\$7,661,127

Note: Retirees who receive pension benefits from both the former General Employees Plan and the former Management Plan are included twice in the above counts.

SECTION F

SUMMARY OF PLAN PROVISIONS

SUMMARY OF PLAN PROVISIONS – CONSOLIDATED PLAN AND FORMER GENERAL EMPLOYEES PLAN

A. Ordinances

The Plan was established under the Code of Ordinances for the City of Miramar, Florida, Chapter 15, Article V, and was most recently amended under Ordinance No. 22-08, passed and adopted on March 1, 2022. The Plan is also governed by certain provisions Part VII, Chapter 112, Florida Statutes and the Internal Revenue Code.

B. Effective Date

December 1, 1980-Amended Plan; Initial Effective Date was August 14, 1967 (Prior Plan)

C. Plan Year

October 1 through September 30

D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

E. Eligibility Requirements

All full-time general employees are eligible for membership on their dates of employment.

F. Credited Service

Service is measured as the total number years and completed months from the date of employment to the date of termination, retirement, disability or death. Vacations and other paid leaves of absence are included. Unpaid leaves of absence are not included. No service is credited for any periods of employment for which the member received a refund of their contributions.

G. Compensation/Earnings

Basic rate of pay from the City, excluding overtime, bonuses, commissions and any other extraordinary compensation. Payments for unused leave are not included.

H. Average Monthly Earnings (AME)

The average of Earnings over the highest 3 years of Credited Service.

I. Normal Retirement

Eligibility: A member may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 65 and 7 years of Retirement Eligibility Service, or
- (2) 20 years of Retirement Eligibility Service regardless of age.

Benefit: Credited Service multiplied by the percentage of AME as provided in the following table.

Years of Credited Service	Multiplier Applied to Service
Up to 20 years	3.25%
Above 20 years	3.00

Normal Form
of Benefit: Single Life Annuity; other options also available.

COLA: None

J. Early Retirement

Eligibility: A member may elect to retire earlier than the Normal Retirement Eligibility upon attainment of age 55 and 7 years of Retirement Eligibility Service.

Benefit: The Normal Retirement Benefit is reduced by 6.0% for each year by which the Early Retirement date precedes what would have been the member's Normal Retirement date if the member had continued employment with the City.

Normal Form
of Benefit: Single Life Annuity; other options also available.

COLA: None

K. Delayed Retirement

Same as Normal Retirement taking into account compensation earned and service credited until the date of actual retirement.

L. Service Connected Disability

Not Applicable

M. Non-Service Connected Disability

Not Applicable

N. Death in the Line of Duty

Eligibility:	Any vested member who dies prior to commencement of benefits is eligible for survivor benefits.
Benefit:	<p>For members eligible for an Early, Normal or Delayed Retirement, the benefit is calculated as though the member had retired on the date of death and had chosen the 10 Year Certain and Life Annuity option.</p> <p>For members who die with 7 or more years of Credited Service but before they are eligible for Early Retirement, a monthly benefit is computed as though the member survived until their Early Retirement date.</p>
Normal Form of Benefit:	Benefit is payable for 10 years.
COLA:	None

The beneficiary of a member who dies prior to being vested will receive a refund of the member's accumulated contributions with interest. The beneficiary of a non-vested member may elect to utilize accumulated, unused leave toward Credited Service at the time of death in order to meet the minimum vesting requirements of the Plan.

O. Other Pre-Retirement Death

Eligibility:	Any vested member who dies prior to commencement of benefits is eligible for survivor benefits.
Benefit:	<p>For members eligible for an Early, Normal or Delayed Retirement, the benefit is calculated as though the member had retired on the date of death and had chosen the 10 Year Certain and Life Annuity option.</p> <p>For members who die with 7 or more years of Credited Service but before they are eligible for Early Retirement, a monthly benefit is computed as though the member survived until their Early Retirement date.</p>
Normal Form of Benefit:	Benefit is payable for 10 years.
COLA:	None

The beneficiary of a member who dies prior to being vested will receive a refund of the member's accumulated contributions with interest. The beneficiary of a non-vested member may elect to utilize accumulated, unused leave toward Credited Service at the time of death in order to meet the minimum vesting requirements of the Plan.

P. Post Retirement Death

Benefit determined by the form of benefit elected upon retirement.

Q. Optional Forms

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to all retirees are a 10 Year Certain and Life Annuity and the 50%, 75% and 100% Joint and Survivor options.

R. Vested Termination

Eligibility: A member has earned a non-forfeitable right to Plan benefits after the completion of 7 years of Retirement Eligibility Service (see vesting table below).

Years Of Credited Service	Vested Percentage
Less Than 7	0%
7 or more	100

Benefit: The member's accrued Normal Retirement Benefit taking into account compensation earned and service credited as of the date of termination. Benefit is payable at the member's Normal Retirement date.

Normal Form
of Benefit: Single life Annuity; other options are also available.

COLA: None

Members terminating employment with less than 7 years of Credited Service will receive a refund of the member's accumulated contributions with interest.

S. Refunds

Eligibility: All members terminating employment with less than 7 years of Credited Service are eligible. Optionally, vested members (those with 7 or more years of Credited Service) may elect a refund in lieu of the vested benefits otherwise due.

Benefit: Refund of the member's contributions with interest. Interest shall be credited to member contributions at the rates decided by the board on an annual interest crediting date to be established by the board. In no event may such interest rate exceed five (5) percent per year.

T. Member Contributions

9.50% of Earnings (1.5% from 10/1/94 through 3/31/95; 3% from 4/1/95 through 9/30/99, 7.36% 10/1/99 through 9/30/18).

U. Employer Contributions

Any additional amount determined by the actuary needed to fund the plan properly according to State laws.

V. Cost of Living Increases

Not Applicable

W. 13th Check

Not Applicable

X. Deferred Retirement Option Plan

Eligibility: The City Manager is eligible for the DROP upon the attainment of 20 years of Retirement Eligibility Service. All other members are eligible to enter the DROP at the earliest eligibility for normal retirement.

A written irrevocable election must be made to participate in the DROP.

Benefit: The member's Credited Service and AME are frozen upon entry into the DROP. The monthly retirement benefit as described under Normal Retirement is calculated based upon the frozen Credited Service and AME.

The City Manager may also elect to have all or a portion of their accumulated sick leave transferred to the DROP.

**Maximum
DROP Period:** 5 years

**Interest
Credited:** General Employees: DROP account balances are self-directed by members participating in the DROP, using the self-directed mutual fund options available under the DROP program.

City Manager: 50% of the City Manager's DROP account is credited or debited at an interest rate equal to the actual investment return earned by the pension plan and 50% of the funds will be invested in a special investment option established by the Board and the City Manager.

**Normal Form
of Benefit:** Members may choose from a lump sum, periodic payments, or rollover of balance to another qualified retirement plan. The City Manager may choose from the above options and a deferral of the distribution of the balance as permitted by law or any other distribution as permitted by law.

COLA: General employees: None
City Manager: 2.0% compounded annually for a period of 15 years.

Y. Other Ancillary Benefits

There are no ancillary benefits-retirement type benefits not required by statutes but which might be deemed a City of Miramar Retirement Plan for General Employees' liability if continued beyond the availability of funding by the current funding source.

Z. Changes from Previous Valuation

None

SUMMARY OF PLAN PROVISIONS – FORMER MANAGEMENT PLAN

A. Ordinances

Plan established under the Code of Ordinances for the City of Miramar, Florida, Chapter 15, Article VI, and was most recently amended under Ordinance No. 22-08 passed and adopted on March 1, 2022. The Plan is also governed by certain provisions Part VII, Chapter 112, Florida Statutes and the Internal Revenue Code.

B. Effective Date

October 1, 2002

C. Plan Year

October 1 through September 30.

D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

E. Eligibility Requirements

All full-time management employees are eligible for membership.

F. Credited Service

Service is measured as the total number years and completed months from the date of employment to the date of termination, retirement, disability or death. Vacations and other paid leaves of absence are included. Unpaid leaves of absence are not included. No service is credited for any periods of employment for which the member received a refund of their contributions.

G. Compensation

Fixed monthly compensation. Payments for unused leave are not included.

H. Final Monthly Compensation (FMC)

The average of Compensation over the 3 consecutive years of Credited Service which produce the highest average.

I. Normal Retirement

Eligibility: A member may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 62 and 5 years of Retirement Eligibility Service,
- (2) 20 years of Retirement Eligibility Service regardless of age, or
- (3) age 55 and 10 years of Retirement Eligibility Service.

Benefit: Credited Service multiplied by the percentage of FMC as provided in the following table. Maximum benefit equal to 80% of FMC.

YEARS OF CREDITED SERVICE*	MULTIPLIER APPLIED TO SERVICE*
5 or less	3.0%
6	3.2
7	3.4
8	3.6
9	3.8
10	4.0

*Additional Credited Service beyond 10 years is multiplied by 2.75% of FMC.

Benefit

Offset: Pension is reduced by the amount received from any of the other three City-sponsored Retirement Plans.

Normal Form

of Benefit: 100 % Joint & Survivor Annuity; other options also available.

COLA: None

J. Early Retirement

Eligibility: A member may elect to retire earlier than the Normal Retirement Eligibility upon attainment of age 50 and 10 years of Retirement Eligibility Service.

Benefit: The Normal Retirement Benefit is reduced by 5.0% for each year by which the Early Retirement date precedes age 55.

Normal Form

of Benefit: 100 % Joint & Survivor Annuity; other options also available.

COLA: None

K. Delayed Retirement

Same as Normal Retirement taking into account compensation earned and service credited until the date of actual retirement.

L. Service Connected Disability

Not Applicable

M. Non-Service Connected Disability

Not Applicable

N. Death in the Line of Duty

Eligibility: Any vested member who dies prior to commencement of benefits is eligible for survivor benefits.

Benefit: A monthly benefit is computed as though the member retired on their date of death and chose the 100% Joint & Survivor option.

Normal Form of Benefit: Payable for the life of the beneficiary.

COLA: None

In the event that a non-vested member dies with sufficient accumulated sick, comp or vacation time to reach 5 years of Credited Service, it will be presumed that the member completed 5 years of Credited Service and the unused leave accounts will be reduced accordingly. The member's beneficiary will then be eligible for the survivor benefits described above. The beneficiary of a member who dies with less than 5 years of Credited Service will receive a refund of the member's accumulated contributions with interest.

O. Other Pre-Retirement Death

Eligibility: Any vested member who dies prior to commencement of benefits is eligible for survivor benefits.

Benefit: A monthly benefit is computed as though the member retired on their date of death and chose the 100% Joint & Survivor option.

Normal Form of Benefit: Payable for the life of the beneficiary.

COLA: None

In the event that a non-vested member dies with sufficient accumulated sick, comp or vacation time to reach 5 years of Credited Service, it will be presumed that the member completed 5 years of Credited Service and the unused leave accounts will be reduced accordingly. The member's beneficiary will then be eligible for the survivor benefits described above. The beneficiary of a member who dies with less than 5 years of Credited Service will receive a refund of the member's accumulated contributions with interest.

P. Post Retirement Death

Benefit determined by the form of benefit elected upon retirement.

Q. Optional Forms

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to all retirees are a Life Annuity, a 10 Year Certain and Life Annuity and the 50% and 75% Joint and Survivor options.

R. Vested Termination

Eligibility: A member has earned a non-forfeitable right to Plan benefits after the completion of 5 years of Retirement Eligibility Service (see vesting table below).

YEARS OF RETIREMENT ELIGIBILITY SERVICE	VESTED PERCENTAGE
Less Than 5	0%
5 or more	100

Benefit: The member's accrued Normal Retirement Benefit taking into account compensation earned and service credited as of the date of termination. Benefit is payable at the date the member would have reached their Normal Retirement date.

**Normal Form
of Benefit:** 100 % Joint & Survivor Annuity; other options also available.

COLA: None

Members terminating employment with less than 5 years of Credited Service will receive a refund of the member's accumulated contributions with interest.

S. Refunds

Eligibility: All members terminating employment with less than 5 years of Credited Service are eligible. Optionally, vested members (those with 5 or more years of Credited Service) may elect a refund in lieu of the vested benefits otherwise due.

Benefit: Refund of the member's contributions with interest. Interest is currently credited at a rate of 6.0%.

T. Member Contributions

13.515% of Compensation.

U. Employer Contributions

Any additional amount determined by the actuary needed to fund the plan properly according to State laws.

V. Cost of Living Increases

Not Applicable

W. 13th Check

Not Applicable

X. Deferred Retirement Option Plan (DROP)

Eligibility: Plan members who have met one of the following criteria are eligible for the DROP:

- (1) age 62 with 5 years of Retirement Eligibility Service, or
- (2) age 55 with 10 years of Retirement Eligibility Service, or
- (3) 20 years of Retirement Eligibility Service regardless of age

Benefit: The member's Credited Service and FAC are frozen upon entry into the DROP. The monthly retirement benefit as described under Normal Retirement is calculated based upon the frozen Credited Service and FAC.

Maximum
DROP Period: 60 months

Interest
Credited: The member's DROP account shall be self-directed, using self-directed mutual fund options available under the DROP program.

Normal Form
of Benefit: Lump Sum, Direct Rollover, or Partial Lump Sum with a Direct Rollover of remaining balance.

Y. Other Ancillary Benefits

There are no ancillary retirement type benefits not required by statutes but which might be deemed a City of Miramar Management Retirement Plan liability if continued beyond the availability of funding by the current funding source.

Z. Changes from Previous Valuation

None
